**Subject:** 2020-2-24 - WAFB -FYI -biotrap samplers installed ST012-

FYI - ADEQ understands Site ST012 Biotrap samplers were installed 2-24-2020. Please note that ADEQ did not observe placement, and I do not have well ID and depth confirmation.

Please note that a communication improvement opportunity exists. If I understand the emails correctly, a miscommunication inhibited ADEQ from observing the Biotrap installation process and verifying well selection and deployment depth.

At ADEQ's request, Steve Willis, UXO Pro, contacted Wood field personnel Friday, 2-21-2020 to confirm biotrap status. Noting the email date and time, the biotrap was reportedly not on site Friday 2-21-2020. As of 1045AM, Mon., 2-24-2020, according to the email chain, the Biotrap was not only received Monday morning (???), but already installed before UXO Pro was contacted.

Carolyn - Please let me know if missing the Biotrap deployment may create an issue for the regulatory agency.

Catherine - Please let me know if the request to observe field activity procedure should be modified.

**To:** Wayne Miller (Miller.Wayne@azdeq.gov) <miller.wayne@azdeq.gov>

Wayne,

I received a call from Kevin out at ST012 at about 1045 this morning. He said the BioTraps were delivered and deployed this morning, so I didn't get a chance to see them go in. He said they put 2 samplers each in 4 wells.  
Steve

**Subject:** WAFB ST012 Status

Wayne,  
I called Kevin Curnutt at Site ST012 this morning and he said he had not received delivery of the BioTrap samplers. I asked him to keep me informed of the sampler deployment status and I didn't hear back from him. Hence, no site visit today.  
Thanks,  
Steve
